

BIO-CHEM Metal-Free Anti-Seize is a white, high performance lubricant on a ceramic basis. It is especially used where extreme temperatures (up to 1,400° C) occur and where the common Anti-Seize cannot be used due to its dark colour. It prevents seizing of bolts and nuts and provides long-term corrosion protection and makes disassembly easy. It is also especially well suited for stainless steel.

Versatile and effective

- Withstands temperatures up to 1,400° C
- High resistance to water, seawater, benzene, as well as to most acids and alkalis
- Good separating and sealing effect
- No galvanic effects
- Metal-free. The effective ingredients are inert.

Characteristics

BIO-CHEM Metal-Free Anti-Seize is free of heavy metals such as nickel, lead or copper. It contains no sulphurous additives and is free of halogens. The product is economical to use. Only a small amount of the paste its required.

Areas of application

BIO-CHEM Metal-Free Anti-Seize is applicable in industries and workshops of maintenance and assembling. It is used under extreme conditions, e.g. high temperature, high pressure as well as for the lubrication of highly stressed bearings and slideways (for slow-speed motors).

- **White, high performance lubricant**
- **Withstands temperatures up to 1,400° C**
- **Separating and sealing effect**

Usage

Clean the surface before application. Stir up the paste thoroughly and apply it thinly with the brush in the cap.

Note

Do not use on oxygen systems nor in connection with acetylene.
