

Cleaning

BIO-CHEM Power Cleaner Hygiene & Mineral is an intensive cleaner that works on the basis of active washing substances (surfactants). BIO-CHEM Power Cleaner Hygiene & Mineral breaks up the surface tension of the dirt, loosening it from the surface area, enabling the easy removal of dirt from any area. BIO-CHEM Power Cleaner Hygiene & Mineral is highly concentrated and enables the easy removal of cement, limestone, urinary calculus, moss, algae and rust, also cleans tarnished brass and copper. Furthermore it removes oil, grease and albumen.

Hygienic Cleanliness

BIO-CHEM Power Cleaner Hygiene & Mineral removes all marks in the bathroom and wet areas including limestone, urinary calculus and black mould, even fittings and sieves work well after treatment with this product. All areas treated are not only cleaned but also at the same time effectively disinfected when using BIO-CHEM Power Cleaner Hygiene & Mineral.

Protection of user and environment

BIO-CHEM Power Cleaner Hygiene & Mineral is non-hazardous and made in accordance with the EC-chemical act. Being water based this product is non-flammable and non-explosive. The surfactants are biodegradable acc. to EC-regulations. Furthermore it is free of hydrochloric acid so there is no danger of corrosion on fittings or pipes.

Economical application

BIO-CHEM Power Cleaner Hygiene & Mineral guarantees an economical application since it can be watered down to 1:40 acc. to application and given dirt accumulation.

Areas of Application

Moss or algae on paving stones, concrete, buildings, grave stones and sandstone can all be safely and quickly cleaned with BIO-CHEM Power Cleaner Hygiene & Mineral. Applying with the aid of a brush or sponge will greatly shorten the cleaning time. Tarnish on brass, copper, aluminium or stainless steel is easily removed, rust requires a slightly longer reaction time.

Application

BIO-CHEM Power Cleaner Hygiene & Mineral can be applied concentrated or watered down to a consistency of 1: 40. Simply apply using a brush, cloth or sponge. BIO-CHEM Power Cleaner Hygiene & Mineral breaks up the surface tension of the dirt, loosening it from the surface area, enabling the easy removal of the dirt by simply wiping with a cloth or spraying down the area using a water hose.

MORE PRODUCTS:

Power Cleaner H&M PLUS

The "plus" version of BIO-CHEM Power Cleaner H&M is highly concentrated and works even in low set-up concentrations. This cleaner removes strong lime residues, rust stains and beer residues/stones.

Power Cleaner DB

BIO-CHEM Power Cleaner DB is a foamless cleaner for usage in parts washing machines. BIO-CHEM Power Cleaner DB is suitable for removal of lime residues in degreasing machines as well as mechanical removal of lime, rust and urine residues/stone (i.e. cleaning of vacuum toilets). The product is highly concentrated and removes mineral soiling effectively even in low set-up concentrations.
