

Smoke Resin Remover Special DB

Cleaning

BIO-CHEM Smoke Resin Remover Special DB is an intensive cleaner for removing strongest dirt like resinated grease and oil, production materials as well as protein based stains.

Universal application

BIO-CHEM Resin Remover Special DB contain selected surfactants which avoid foam forming during cleaning. Thus, this cleaner could be universally applied in parts washing machines, single- and multi-chamber spray plants, dipping plants as well as in other cleaning equipment. The cleaner could be heated whereby his cleaning activity will be further increased and the cleaning time shortened.

Corrosion prevention

Special corrosion prevention inhibitors in BIO-CHEM Smoke Resin Remover Special DB do guarantee an effective, temporary protection against corrosion after cleaning.

Kind to the Environment

BIO-CHEM Smoke Resin Remover Special DB contains only surfactants which correspond with the EC-guidelines on biodegradability. The product does not contain phosphates and is a non-flammable and non-explosive product.

Cycle control

BIO-CHEM Smoke Resin Remover Special DB is well suitable for the application in mechanical cycle systems. Oil or grease entered into the cleaning and degreasing bath is not emulsified and can be, therefore, easily and quickly separated by mechanical methods (f.e. by BIO-CHEM Plate separator). The service life of these process-baths is extended and costs for waste disposal reduced.

- **Highly cleaning and degreasing effect**
- **Removes strongest dirt accumulations**
- **Does not contain phosphates**
- **Foamless**

Areas of application

BIO-CHEM Smoke Resin Remover Special DB is applicable for cleaning and degreasing of industrial and mechanical equipment's in many different industries. Strong fat residues and obstinate incrustations adhered to antifriction- and roller bearings, wheels sets. etc. are quickly removed.

Application

The cleaner effects already in set-up concentrations of 1:100 with water. The reaction time depends on age and degree of dirt accumulation. After cleaning the surfaces have just to be rinsed with water.

Note

BIO-CHEM Smoke Resin Remover Special DB contains potassium hydroxide. It causes severe burns. Take care for children and use gloves and eye/face protection during the work. Do not mix the product with other cleaners.
